

WorstCoin (WRC) – White Paper

1. Introduction

WorstCoin (WRC) is a decentralized meme token on the Solana blockchain, born out of chaos, humor, and an ironic twist: what if the worst idea actually became the best movement? Launched via Pump.fun, WorstCoin embraces full transparency, no utility (yet), and a community-first mindset.

2. Vision & Purpose

WorstCoin's goal is to bring people together not through hype or promises—but through shared humor, memes, and a rebellious spirit. We're not trying to be the next Bitcoin—we're trying to be the worst coin that everyone talks about.

In a sea of serious projects, WorstCoin stands out by not taking itself seriously—and ironically, that's what makes it worth paying attention to.

3. Launch Details

Platform: Pump.fun

Blockchain: Solana

Launch Type: Fair launch

Initial Supply: 1,000,000,000 WRC

Ownership: 100% to the public. No team tokens, no pre-sale, no VC money.

Contract: 6xPfLQLBYP33rURdtQbo2NeMxRnccVAgfmiAVpqXpump

4. Tokenomics

Component | Allocation

--- | ---

Pump.fun Launch | 100%

Team Allocation | 0%

Marketing Fund | 0%

Airdrops | From community donations only

Taxes | 0% buy/sell

Token Type: SPL (Solana Program Library)

Liquidity: Fully driven by pump.fun and post-launch community actions

Governance: Community-driven via memes, polls, and anarchy

5. Roadmap (WorstPlan)

We don't promise anything. But here's our worst-case scenario that somehow might happen:

Q2 2025

- Launch on pump.fun
- Meme storm on Twitter/X
- Build Telegram Community

Q3 2025

- Create basic website
- Community meme contest
- List on community-driven DEXes (Jupiter, Raydium)
- First community NFT drop ("Worst PFPs")

Q4 2025

- Launch WorstDAO for governance memes
- Integrate staking just for bragging rights (no rewards)
- First IRL sticker bombing campaign
- Collab with other meme tokens

Q1 2026

- Launch "WorstChain" Testnet (if the memes allow it)
- Sell branded toilet paper with WorstCoin logo
- Partner with influencers who don't know what they're promoting

6. Community Strategy

The community is everything. WorstCoin's power comes from:

- Memes: Every meme is a vote.
 - Contests: Monthly meme-offs and sticker design challenges.
 - Raid Squads: Meme raids on trending posts to spread awareness.
 - Builders Welcome: You want to build a WorstBot or WorstWallet? Go for it.
- We don't need VC backing. We need meme warriors.

7. Future Features (Maybe)

- WorstStaking: Stake WRC to get... nothing. Just vibes.
- WorstNFTs: Profile pics you'll be embarrassed to show, but proud to mint.
- WorstDAO: Use WorstCoin to vote on nonsense proposals.
- WorstBridge: A bridge to nowhere (maybe Solana <> Ethereum, if we figure it out).

8. Legal Disclaimer

WorstCoin is a meme token with no inherent value, utility, or expectation of profit. It is not an investment and should not be treated as such. This project is 100% community-driven and exists for entertainment and cultural experimentation. Always DYOR (Do Your Own Research) and only spend what you can afford to lose.
